

Environmental Policy

Brugarolas is a company committed to the environment and sustainability, working daily to improve its environmental management system.

The company seeks a balance and development, addressing the different environmental aspects and transmitting the performance to all the company's employees and its stakeholders.

Brugarolas' suppliers and customers are also made aware of the policy in order to cooperate with the overall objective.

Develop our activity with responsibility, taking into account sustainability in the development and production of our products, respecting and protecting the environment, reducing the environmental impacts generated by the activity, including the prevention of pollution.

Encouraging good practices throughout the company to reduce energy consumption (electricity and gas), water and paper consumption, by compiling annual statistics and striving for energy efficiency.

Responsible management and consumption of chemical products used as raw materials in the manufacturing processes in the production lines. Awareness-raising measures for the use of these products among workers through training.

Incorporation of renewable energy sources in the form of photovoltaic panels, in order to mitigate the impact of greenhouse gas (GHG) emissions.
Calculation of Brugarolas' Carbon Footprint (Scope 1 + 2) and annual emissions reduction plan.

Compliance with the current legislation, carrying out a periodic review of environmental aspects and promoting continuous improvement of the Environmental Management System, in order to minimize the environmental impact of the activity.

Monitoring and control of all waste generated in Brugarolas, proposing actions of reduction, reuse and recycling. Priority is given to the valuation of waste as a final treatment.

Control of the management, consumption and quality of the company's wastewater, performing periodic analyses to ensure its quality.

Promote awareness and training of employees on the environmental aspects that their activity may generate, making them participants in their control, as well as the adoption of good environmental practices in their workplace.

This Environmental Policy is signed by the General Management, and will be delivered to all interested parties, in order to be understood and applied.
