

Quality Management and Environmental Policy

Brugarolas is a company that designs, develops, produces and markets lubricants for the automotive sector and other industrial sectors, focusing its efforts on the needs and expectations of our customers, employees, shareholders, suppliers and society in general, always through our commitment to quality, safety and the environment.

Our goal is to be considered by our strategic stakeholders as a reference group in the development and production of lubricants, always driven by a desire for continuous improvement in all areas of the company, promoted through innovation, service, quality, occupational safety and respect for the environment.

Regularly provide products that meet customer requirements and expectations and increase customer satisfaction through the effective application of our processes and resources.

Develop, manufacture and market products that conform to your specifications, in addition to complying with applicable legal and regulatory requirements.

Place people at the center of our management model, favoring training, participation and transparency, which stimulates them to assume new responsibilities, in a climate of mutual trust, promoting their satisfaction.

Promote the awareness and training of employees on the environmental aspects that their activity may generate, making them participants in the control of them, as well as the adoption of good environmental practices in their workplaces.

Always maintain a strategic vision based on minimizing the risks identified and promoting the continuous improvement of our management systems, through their revisions.

Develop our activity responsibly and taking into account sustainability in the development and production of our products, respecting and protecting the environment, reducing the environmental impacts generated by the activity, including the prevention of pollution.

Encouraging the practices of:

- Reduction of consumption (energy, water, paper)
- Analyze the life cycle of products and raw materials used
- Reduction and recovery of waste

Carry out a periodic review of the environmental aspects, derived from our activity, in order to continuously improve the Environmental Management System.

This Quality and Environment Policy will be disseminated among all interested parties in order to be understood and applied.
